Sale Ad Begins 2-1-12 and Ends on 3-1-12

- E-Series battery chargers are made in the USA and tested to UL and CSA standards.
- Lester Electrical charging and termination algorithms prevent both undercharging and overcharging.
- Efficient convection-cooled design offers optimal heat dissipation without the need for a cooling fan.
- An internal jumper can be used to select between Wet, AGM, or Gel Lead-Acid Batteries profiles in the field.
- The E-Series controller is completely encapsulated in a protective material. This protects the electronics from moisture and corrosion.
- The chargers will periodically provide a special refresh and conditioning charge to the batteries during longterm storage to overcome battery self discharge and reduce sulfation.
